

Different PosterJet versions on one machine

The logo for PosterJet 7, featuring the text "PosterJet" in orange and "7" in a larger, bold orange font, with a registered trademark symbol (®) to the upper right of the "7". The logo is set against a background of a horizontal bar with a grey-to-white gradient.

Different PosterJet versions on one machine

It is not possible to run different versions of PosterJet at the same time on the same machine. It is possible to install different versions of PosterJet on the same machine and to run them one after another. Make sure to install the related dongle for the used PosterJet version and to remove the dongle for the unused version.

E.g.: if you have installed PosterJet 7 and PosterJet 6.57 and you would like to run PosterJet 6.57 then remove the dongle for PosterJet 7 and install the dongle for PosterJet 6.57 before starting the application. To use PosterJet 7 perform the appropriate action.

PPD and Port Monitor

Important: If PosterJet 6.5 and PosterJet 7 are installed on the same PC, just one Port Monitor (PosterJet Port for the PPD printers) works! If the user would like to work with Version 7, all PosterJet printers (e.g. "HP Designjet 5500 by PosterJet") must be deleted over the Windows control panel before installing PosterJet 7.
